LET THERE BE LIGHT!

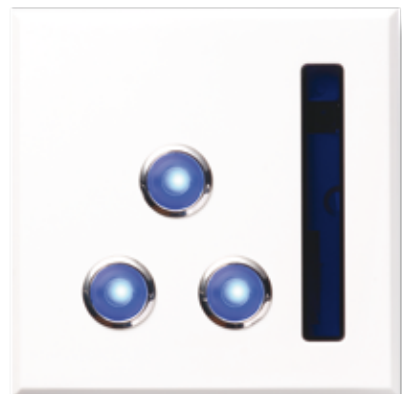

ONE STYLISH REMOTE CONTROL TO THE RESCUE.

It is late at night. You need to go to the bathroom, but you can't find your way there because it is too dark. "I'll turn on the light," you think, but you can't find the light switch, because it is too dark! How do you resolve this situation?

Deng Kai has come up with a solution! With the new remote-controlled electronic wall switches, you no longer have to fumble about in the dark looking for a light switch, when the switch is with you all the time! With one remote control, you can control up to 20 Deng-Kai switches all around your home. All Deng-Kai remote controls are programmable, allowing you to control multiple light sources with a single button.

Deng-Kai switches also come with a sleep/timer function. With this, the switches can also be set to turn on and off at a regular period, so that after a day's work, you can come home to a fully-lit house. Whereas the sleep function is used to automatically turn off the lights after a set period of time.

Once you have experienced the convenience of using Deng-Kai switches, you might never go back to traditional switches! Visit www.deng-kai.com for more information.
